BREMERTON-KITSAP CO.
DEPT. OF PUBLIC HEALTH

Mr. Bob Lloyd
Kitsap County Commissioner
614 Division St.
Port Orchard, Wn.

Dear Bob:

This is to confirm our conversation of today relative to the burning being done at the Ames Trash Dump near Sunnyslope.

We have written a burning permit to cover the burning of cars, and the trash from his presently operating trash dump.

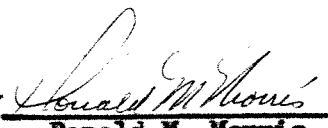

Your statement that this trash burning is a violation of the re-zone certainly causes us to reconsider our burning permit. We must keep upper most in our mind the hazard being created by the trash dumping. Should we cancel our permit it would not eliminate the hazard, but actually create a larger hazard by not burning. I would recommend the following action in order to solve the hazard problem.

- 1) Since the re-zone specifically denied burning, the permit or authority to operate the trash dump be revoked, or action be taken by the Health Dept. to make this an actual sanitary land fill operation.
- 2) When the above action is taken we would cancel the burning permit.

I have discussed our requirements for the operation of a large dump, such as would result from the Navy contract, with "Ames". We have not issued any burning permit to cover this operation. The site they have, with proper precautions, would be fire safe, yet we will not issue any permit that would be in violation of County ordinances. As long as we maintain good communications we should be able to solve these problems before they exist.

Yours truly,

BERT L. COLE, Commissioner
